### *Lunations and Long-term Aspects*

This month's Full Moon on December 6 is in Gemini, your 11th house of friends, groups, organizations, goals, hopes and wishes so look for the culmination, shift to a different phase or ending for something in this part of your life. Meanwhile, the Sun is in fellow Fire Sign, Sagittarius, which is your 5th house of ego definition, creativity, children, romance, entertainment and speculation, throwing light on that part of your life as well. This suggests a time when creative ideas are in abundance and deriving fun from them is favored. If your birthday is right around August 7th this lunation forms an aspect pattern known as a Triangle of Potential with your natal Sun which can provide you with the leverage you need to take advantage of these energies. Innovation is favored as far as those ideas are concerned as well and being original is definitely to your advantage if you happen to make a living in a way that involves those 5th house elements. Pluto continues to plod through Capricorn, your 6th house of work, health, service and pets where he is probably transforming something in this part of your life. His connection with the Moon suggests a slight change of direction with regard to your work or job as the result of a friend or perhaps slight change in one of your goals.

Jupiter stations retrograde on December 8 in your sign and he's conjunct your natal Sun if your birthday is right around August 15. Jupiter is considered benefic but in reality I have found him to be somewhat neutral, much like Mercury, with him simply inflating or exaggerating what he touches. Of course sometimes this does equate with luck or good fortune. Jupiter conjunct your natal Sun can bring increased confidence but don't let it get so far out of hand that it comes across as arrogant. While retrograde Jupiter's energy is internalized and more directed toward philosophical issues which makes it a favorable time to consider your philosophy of life, attitude and view of the world along with anything you've learned that may necessitate a few changes. It's easy to miss life's lessons when you don't look at them specifically as such. Particularly any that brought unfortunate consequences should be examined closely to make sure they aren't repeated. Like they say, "If you keep on doing what you've always done, you'll keep on getting what you've always got." Be honest with yourself and recognize that this is often easier said than done unless you put a lot of commitment into the change.

December 21 is a busy day astrologically starting with Uranus stationing direct. He is currently in partile (same degree) square with Pluto which is stirring up a variety of issues, including rebellion against authority. You may find this applies to something going at work which you don't agree with. Note in a general sense that Pluto in Capricorn will root out and expose corruption at the corporate and governmental level. There has certainly been plenty of that lately and it will continue to bring disruptions, disturbances, rebellion and unexpected events, especially while in tight aspect, which will last until near the end of the month. Uranus is the planet of freedom and breaking free and in your 9th house suggests letting go of old beliefs and expectations. Mars is transiting Aquarius, your polar sign and 7th house of relationships including your significant other, close friends and relatives, business professionals, business partners, competitors and open enemies. This could possible result in some

arguments or issues with such individuals. Consider carefully whether the situation is worth working out or whether you've be better off with this person out of your life.

Eighteen minutes and twenty-two seconds after Uranus stations the Sun goes into Capricorn which marks the winter solstice in the Northern Hemisphere and summer solstice in the Southern Hemisphere. Whenever the Sun enters a Cardinal sign (Cancer, Libra, Capricorn and Aries) it marks the start of a new season. This chart therefore suggests the flavor of the coming three months and is used in weather prediction such as what you find in the Old Farmer's Almanac as well as mundane and geo-political astrology. There is a lot of energy in Capricorn which further emphasizes that sign along with the square between Pluto and Uranus so expect a lot of noise coming from corporate and government interests which is not likely to be well-received.

Two hours, thirty-two minutes and fifty seconds after the Capricorn Ingress the Moon joins the Sun for this month's New Moon. Watch for something new related to your work, health or pets. If your birthday is right around July 23 you may encounter a change of direction in this area. Saturn is just about ready to leave Scorpio which will occur on December 24. He has been in that sign which represents your 4th house of home environment, cultural roots, memories, endings and beginnings for a couple years which could have meant some difficulties or challenges in that part of your life. These should begin to diminish as he goes into Sagittarius, your 5th house of creativity, children, romance and so forth as described above. Saturn is a favorable influence for achieving discipline, taking responsibility, planning and imparting structure so bear that in mind so you can use it to advantage over the next few years.
