Lunations and Long-term Aspects

This month we're due for another Mercury retrograde spell which begins on June 7. Mercury stations in Cancer, your 3rd house of thoughts, ideas, siblings, neighbors and local travel and will sextile your natal Sun if your birthday is right around April 24. This is a favorable time to rethink or revise something that could benefit from a few changes. Mercury rules your 2nd house which includes your income, possessions and finances so these are likely to be involved as well as children, romance, entertainment or speculation. Inspiration is available so be sure to find some quiet time to access it. A brainstorm is possible that relates to your emotional and financial needs which you have probably been thinking about lately.

This could tie in with a close relationship in some way whether it's your significant other, business partner or close friend or relative. Take a close look at the important people in your life and consider any changes that need to be made within the relationship, something that Saturn retrograde may be trying to convey. Look for issues that relate to responsibility and may also involve money or simply meeting your needs. Mercury eventually backs into Gemini, your 2nd house of income, possessions, finances, needs, comforts and pleasures which suggests rethinking those matters as well.

A change of direction associated with your job is possible and may relate to your long-term goals. Your friends may be a source of inspiration as well, so share your thoughts with them and also get out and do some socializing to see if anything comes your way there. Your sign ruler, Venus, is in your sign until June 24 so take advantage of that as well. When Venus transits your first house even your physical appearance can be enhanced and you are likely to be well-received by others, making it a favorable time to present your ideas or express yourself.

The Full Moon on June 12 occurs in Sagittarius, your 8th house of intense experiences, sex, death and rebirth, inheritances, things you suppress, shared resources and debt. If your birthday is right around May 13 you are more likely to notice and experience an important change, perhaps as the result of pursuing a big idea. It may be a good idea to watch your back during this time when something from your past may spring up and cause some issues. Be mindful of your health as well and be particularly on the lookout for some old problem to crop up again. Encountering some issues at work are possible and arguing with coworkers may occur or if you're trying to move forward you may encounter resistance, particularly from competitors. With Pluto in your 9th house for the long-haul, this tends to be a call to get rid of any old beliefs that no longer serve you and may be holding you back. Take a close look at your philosophy of life with a mind toward any improvements you could make. Remember a Full Moon typically brings an ending, culmination or shift to a new phase.

The New Moon on June 27 is in Cancer, your 3rd house of thoughts and so forth as noted above under Mercury retrograde. Watch for something new as a result, particularly if your birthday is right around April 27. If you're not happy with your job you may feel

inclined to break away but something could be holding you back, perhaps related to your belief system. This is a time to remember if you keep on doing what you've always done, you'll keep on getting what you've always got. As a Fixed sign it's not easy for a Taurus to take risks and change direction, but if you're not totally satisfied with the status quo then it's going to involve making some changes, like it or not. Inspiration, perhaps from a friend, is possible and formulating new goals is favored, even though it's likely to take some effort to bring them to fruition. They may seem farfetched or unrealistic, but if that's what you want you need to take them seriously. Continue to take a close look at your relationships and the balance of responsibilities involved. It may be time to break away from any that are dysfunctional and your subconscious may be trying to nudge you in that direction.
