The Education and Communication Map

The Education and Communication Map shows geographic areas where you feel mentally stimulated and more likely to be involved in communicating through speaking, writing, or other means.

Areas on the map that are tinted with a red color are the best areas for communication, sharing ideas, and learning. Yellow areas are also good, but not as powerful as the red areas. The orange-colored areas fall in between the red and yellow areas in intensity. A geographic area varies from light yellow (slight emphasis) to deep red (strongest emphasis).

An area with no coloration is not an area that is specifically indicated for increased learning and communication. However, you should also refer to the Business and Career Map, Friendship and Family Map, and other Maps because, for example, an area that is indicated as being strong for business is an area where you are likely to be very active and successful, and this success will benefit you mentally as well. Similarly, an area indicated as positive in the Friendship and Family Map is a place where you are likely to feel very comfortable and at home, and all areas of your life tend to blossom and develop when you are located in a place where you feel at home. In some ways, the Education and Communication Map is secondary in importance to the Friendship and Family Map because most people thrive only in a place where they feel at home. The Education and Communication Map is also important because it shows areas where you are mentally stimulated. This does not mean that if you live in an area that is not have a yellow or red tint in the Education and Communication Map that you are destined to a boring life that does not inspire you with new ideas and help you develop mentally. It simply means that education and communication are not likely to be highlighted and easily come to the forefront of your life. Other issues are more likely to be most prominent for you.

You should use common sense when studying your Education and Communication Map. For example, if you move to a place with excellent libraries and bookstores, experts in the areas that you are most interested in, and other opportunities to learn, develop expertise, and to share your knowledge with others, then a lack of emphasis on the Education and Communication Map is not likely to make all of these facilities and opportunities vanish into thin air! On the other hand, a place with similar facilities and opportunities that is indicated in your Education and Communication Map is likely to offer even better opportunities for you in the long run.

If you move to a place that is tinted red in the Education and Communication Map but you do not expect many opportunities for learning and communication in this area, you may be surprised to find out that the place works out better for you in this regards than you had expected.

Note also that astrology is not fatalistic. It is up to you to utilize the energies available to you in the best possible way. Astrology can help you better understand what kinds of energies underlie your present situation, and thereby help you to take the right steps to

improve your life.

The Education and Communication Map shows areas where you are most likely to learn and communicate. There are also qualitative differences to various geographic areas. In some areas, for example, you may be involved more in reading and researching and in other areas more involved in exploring new, creative ideas that you had not considered before. Given below is a brief explanation of the influences that are in your Education and Communication Map. If you follow the lines through the map, you will see astrological symbols in a light yellow or pink oval-shaped area. Locate the symbol on the pages below to see what the "flavor" of this influence is. In the description of these astrological influences we frequently emphasize what you can do to utilize the astrological influence to best advantage. As we said earlier, astrology is not fatalistic and should never be an excuse for failure or problems in your life. You have the ability and opportunity each day to express the energies available to you in new, creative, positive life-enhancing ways.

Areas of intensity on your Education and Career Map are very sensitive to accuracy of birth time. On average, a difference of 1 minute in the time of birth can move the astrological influence about 15 miles in an east-west direction. Because it is very possible that your birth time can be inaccurate by a few minutes, you may find that the Education and Communication Map can pinpoint the towns and cities that are most suitable for you, but you must rely on your own intuition to guide you to the most suitable areas within that town.

Your Education and Communication Map is based on the most sophisticated and accurate astrological techniques available. These astrological influences have not yet been scientifically verified and astrology is a very controversial subject, but we do believe that there is validity to this map, and we hope you find it useful.

You are likely to be involved in public speaking, writing, or communications here. This is a good place for sharing ideas and learning.

Public speaking, writing, and communications of all kinds are likely here. In one way or another, you are likely to be very involved in sharing ideas with others while in this area.
