## The Imagination, Inspiration, and Illusion Map

The Imagination and Inspiration Map shows geographic areas where you are more likely to feel inspired, with heightened intuition and a strong imagination.

If you are involved in the arts, music, literature, or other creative areas, you are likely to find that new ideas easily come to you while you are in geographic areas where your intuition and imagination are intensified. You may also have more vivid dreams, and mystical or psychic experiences. These geographic areas are often good places to vacation or retreat from the everyday demands of life. However, these geographic areas can have negative effects as well as positive ones. You may find it more difficult to handle practical affairs, and your keen imagination can interfere with your ability to effectively handle daily chores and responsibilities. If you have a history of emotional or mental instability or weakness, or if you are a heavy drinker or use any kind of stimulants or drugs, you are likely to find that in these geographic areas life becomes more difficult for you because you will find it very difficult to cope with daily challenges. The increased sensitivity and imagination that you have in these geographic regions can have positive and/or negative results depending on your ability to successfully handle the astrological influences.

Areas on the map that are tinted with a red color are the best areas for heightened imagination and intuition. Yellow areas are also good, but not as powerful as the red areas. The orange-colored areas fall in between the red and yellow areas in intensity. A geographic area varies from light yellow (slight emphasis) to deep red (strongest emphasis).

An area with no coloration is not a strong area for imagination and intuition. This does not mean that you are destined to be totally void of imaginative ideas and sensitivity if you live in one of these areas. It simply means that there is no astrological boost to help you develop imagination and intuition beyond what you naturally possess, but this fact does not mean that there is a roadblock that prevents you from being highly imaginative and intuitive. You are less likely to attract people into your life who are highly imaginative and intuitive or to discover unusual art and music, but this by no means indicates that the muses suddenly completely cease to inspire you simply because you live in a particular geographic area. A creative artist or poet, for example, will continue to create new and beautiful works no matter where geographically located.

You should use common sense when studying your Imagination and Inspiration Map. For example, if you live in an area of unusual geographic beauty and splendor, and the local population has a great number of creative artists, writers, musicians, etc., then of course you will feel inspired in this area even if your Imagination and Inspiration Map shows has no red or yellow tint in this area. Also, some people have a particular love for a particular kind of environment, perhaps mountains, or ocean, or a tropical climate and atmosphere or perhaps a rugged environment with cold winters and mild summers. The culture, natural environment, architecture, and available resources will have a huge effect

on your response to a particular geographic region. Astrological influences will not negate the importance of these factors.

However, some people are surprised to find a creative group of people to share artistic ideas and inspirations in a town that seems not very different from other towns where they felt little support and interest in their creative pursuits. People do react differently to the same geographic area. Two artists with similar lifestyles can visit a place famous for its beauty, such as Hawaii, or an area known for its strong community of artists, such as Paris, France or Vienna, Austria, and have very different reactions to these areas. The Imagination and Inspiration Map can help you identify those areas that are either favorable or unfavorable for unknown reasons. Astrology often explains what otherwise is difficult to understand.

Note also that astrology is not fatalistic. It is up to you to utilize the energies available to you in the best possible way. Astrology can help you better understand what kinds of energies underlie your present situation, and thereby help you to take the right steps to improve your life.

The Imagination and Inspiration Map shows areas where your imagination and intuition are heightened. There are also qualitative differences to various geographic areas. In some areas, for example, the effect may be more emotional, inclining you to dreamy romantic feelings, and in other areas it may be mental, inspiring new imaginative, creative ideas. Both areas are good for heightened imagination and intuition but in different ways. Given below is a brief explanation of the influences that are in your Imagination and Inspiration Map. If you follow the lines through the map, you will see astrological symbols in a light yellow or pink oval-shaped area. Locate the symbol on the pages below to see what the "flavor" of this influence is. In the description of these astrological influences we frequently emphasize what you can do to utilize the astrological influence to best advantage. As we said earlier, astrology is not fatalistic and should never be an excuse for failure or problems in your life. You have the ability and opportunity each day to express the energies available to you in new, creative, positive life-enhancing ways.

Some symbols have a number between the 2 glyphs of the planets. If the number is 20, 80, 100, 140, or 160 it will not appear in the list of symbols below, but it has the same meaning as the number 40. Here is a list of numbers that do not appear in the list of symbols below, and the number in the symbol with the same meaning:

40 is the same as 20, 80, 100, 140, and 160

72 is the same as 36, 108, and 144.

51-26 is the same as 25-43, 77-09, 102-51, and 154-17.

Areas of intensity on your Imagination and Inspiration Map are very sensitive to accuracy of birth time. On average, a difference of 1 minute in the time of birth can move the astrological influence about 15 miles in an east-west direction. Because it is very possible that your birth time can be inaccurate by a few minutes, you may find that the

Imagination and Inspiration Map can pinpoint the towns and cities that are most suitable for you, but you must rely on your own intuition to guide you to the most suitable areas within that town.

Your Imagination and Inspiration Map is based on the most sophisticated and accurate astrological techniques available.
